Chancellor's Message [Developing your Strengths and Leaping into the World]

There is something very important I want you to learn at Japan Aviation Academy.

First: Find your strengths and areas of expertise. Then improve upon them. This will give you the power to live your life.

Second: Take care when you speak. Never use self-deprecating or negative words. Think to yourself, "This is good," and "Everything is going well," regardless of what the situation is. "I'm glad," "This is fun," "I'm happy," "Thank you," "I'm grateful," "I love you," and "I forgive you," are words you should always use. You were born to be loved.

Third: There are three viewpoints among people: Your own viewpoint, the other party's viewpoint, and the overall viewpoint both parties are satisfied with. There are the viewpoints of parents and children, teachers and students, or between yourself and a friend. Discuss and consider the viewpoints of others as much as possible. Schools are small societies, so we should not only learn subjects in general,

Japan Aviation Academy
Chancellor

Shigeo
Umezawa

but also all these viewpoints in order to unlock the power of our potential as human beings.

Fourth: We should reconcile with all of heaven and earth. Indeed, you are part of the universe; one member of the human race, one individual of Japan. You were born to be loved. Thanks to nature, human society, and your family, you are alive.

From this point forward, you will live a blessed life. With a smile upon your face, embrace your life at Japan Aviation Academy.

Principal's Welcome

To our students who dream of flying high, and to their families:

From the vast Hokkaido lands to the world whose sky we share, we nurture the aviation professionals of tomorrow. What we value most is not just the mastery of technical skills, but a holistic education that refines human character.

True freedom is achieved only through the strength of self-discipline. The integrity and sense of responsibility cultivated through our school life form the foundation for professionals who will one day bear the responsibility of aviation safety.

We are also deeply committed to global education. It is increasingly vital in today's society to carry a broad perspective, experience diverse cultures and values, and be able to effectively communicate ideas and collaborate with others. To that end, we have enriched our English curriculum, provided opportunities to study abroad, and we actively welcome international students to our campus. Through these daily interactions, our students feel a genuine connection to the world while gaining practical communication skills and global awareness.

Japan Aviation Academy
Japan Aviation High School Hokkaido
Principal

Hiroshi
Yamamoto

These capabilities form the cornerstone for our students to become not just respected members of society, but also trusted professionals who prioritize global aviation safety.

Should you aspire for the skies, you may be certain that all faculty and staff look forward to giving you our full support.

Celebrating 100 years of Chitose Airport

The first "Hokkai" aircraft touched down on the landing strip built by the villagers of Chitose in 1926. This year, October 2026, will mark the 100th anniversary of Chitose Airport. To celebrate this anniversary, our school is participating in various projects.

Educational Philosophy

FREEDOM
AND
DISCIPLINE

DEVELOP
YOUR
STRENGTH

BE SYMPATHETIC
AND
GROW TOGETHER

GLOBAL
EDUCATION

To everyone aiming for the aviation industry

The aviation industry supports people's lives, promotes the creation of new value, and contributes to the development of regions and nations through a network connecting various parts of Japan and the world.

Meeting loved ones who are far away, Breathing in the air of a new place, Experiencing local people and culture firsthand, Transporting fresh ingredients and essential goods.

Each person has their own reason for using airplanes.

To make these experiences possible, everyone involved in the aviation industry works as professionals, supporting safe operations every day.

The aviation industry will continue to grow to fulfill the aspirations of even more people.

We look forward to working and growing together with you.

The Scheduled Airlines Association of Japan

The Scheduled Airlines Association of Japan aims to conduct initial surveys and research related to the airline transportation industry, with the goal of promoting the sound development of our country's airline transportation business. For more details, please visit our website.

Integrated Aviation Training between High School and College

- 1 Continuing career education
- 2 Integration between high school and college
- 3 Guidance for high school students by teachers from the college
- 4 Active utilization of the buildings, facilities, and equipment of the college

More than a school affiliation

Japan Aviation High School Hokkaido is located at the same place as its college counterpart. By maximizing the advantages of a shared campus, students can receive a consistent high school-university education. This includes utilizing the facilities and equipment of the college, as well as attending classes taught by college faculty: professionals in the field with extensive experience. As part of Japan Aviation Academy, by having high school and college working together to foster individuals who possess the essential qualities of a working professional, technical skills and human capacity, we can offer a diverse range of continuous program development.

A special open campus event made available to high school students thanks to the effort and cooperation of the college. Taking advantage of both school tradition and proximity from New Chitose Airport, we offer airport tours and vocational research that serve as career education, and cultivate an image of future progression, via high school, college, and employment.

In-Flight Training

We offer comprehensive flight training for all students, providing a hands-on experience that goes far beyond the classroom. This unique "learning in the air" program, which is exclusive to our school, allows students to step into the cockpit and observe firsthand how pilots navigate and operate an aircraft. By monitoring real instruments and experiencing the physics of flight, students gain a deep, practical understanding of aviation. Plus, the breathtaking views from 1,200 meters make every lesson an unforgettable experience.

Produce Yourself class, taught by Hitomi Toyosawa

This class aims to help students discover their own appeal and cultivate their expressive abilities. First, through self-analysis, students can learn about their own strengths and what they are good at. They also practice vocalization and announcement-making to gain the confidence to speak in front of others. By honing self-understanding and communication skills, this practical learning directly connects to future college admissions and employment.

Hitomi Toyosawa

Born in Chitose City, Hokkaido. Radio personality, TV talent, and yoga instructor. In 2018, Ms. Toyosawa won third place at the Miss Universe Japan National Competition, the highest ranking ever achieved for the prefecture of Hokkaido. She is active in many fields including modeling, MC work, beauty school classes, and event management at sauna facilities.

ENJOY LEARNING REAL ENGLISH!

Native-speaking teachers go beyond traditional English education, offering lessons through the GATE experience (see above). The books in the "Da Vinci Library" classroom are all in English. By engaging with English in a fun, daily and spontaneous manner, students can overcome any apprehension and develop practical language skills. We also provide solid support for certification acquisition, helping each individual achieve their personal goals.

Interview

Andrew
Knable,
English Teacher

English is a living language.
The more you are exposed to it,
the better you become.

In my classes, we don't memorize grammar rules; we naturally acquire living English. What is especially effective is "Extensive Reading," which involves reading English books. Students aren't chasing after notes for tests or the blackboard; they simply enjoy reading. Inputting a large volume of English speeds up your language processing and consequently improves your listening skills. It's an experience equivalent to studying abroad, right here in Japan.

PBL Characteristics of PBL classes

PBL
Problem
Based
Learning

We use the Project Based Learning (PBL) methodology, focusing on the Comprehensive Inquiry Time during class. Students identify problems for a given topic and find solutions on their own while discussing with their classmates. Through this process, students develop their thinking and communication skills by repeatedly producing output such as discussions, fieldwork, reports, presentations, and information sharing.

Campus Map

Fully air-conditioned classrooms and training facilities!

Wi-Fi is available throughout the entire campus.

Our school occupies a vast site in Chitose City. New Chitose Airport, the "Gate to Hokkaido", is located here. Surrounded by nature, the lush green campus provides an environment where students can experience our school's aviation education using a wide range of training equipment.

8-1 Da Vinci Hall

A warm and inviting space with natural wood accents. Sunlight pours in from all sides, allowing students to enjoy the changing seasons while learning in comfort. Each class has its own homeroom, and many lessons take place here.

1 Skills Examination Building

A test venue for candidates to obtain a nationally recognized aircraft maintenance technician (AMT) certification.

2 Aircraft Hangar

Small aircraft and helicopters for training are stored here.

3 Training Wing

Hands-on training for engine maintenance, welding, and sheet metal.

4 Training Area / Ramp (Aircraft Apron)

A vast facility for aircraft parking, engine testing, taxiing, and practical vehicle training.

5 Classroom Building

Practical training and lectures on large aircraft and electrical systems are conducted here.

6 Training Vehicle Garage

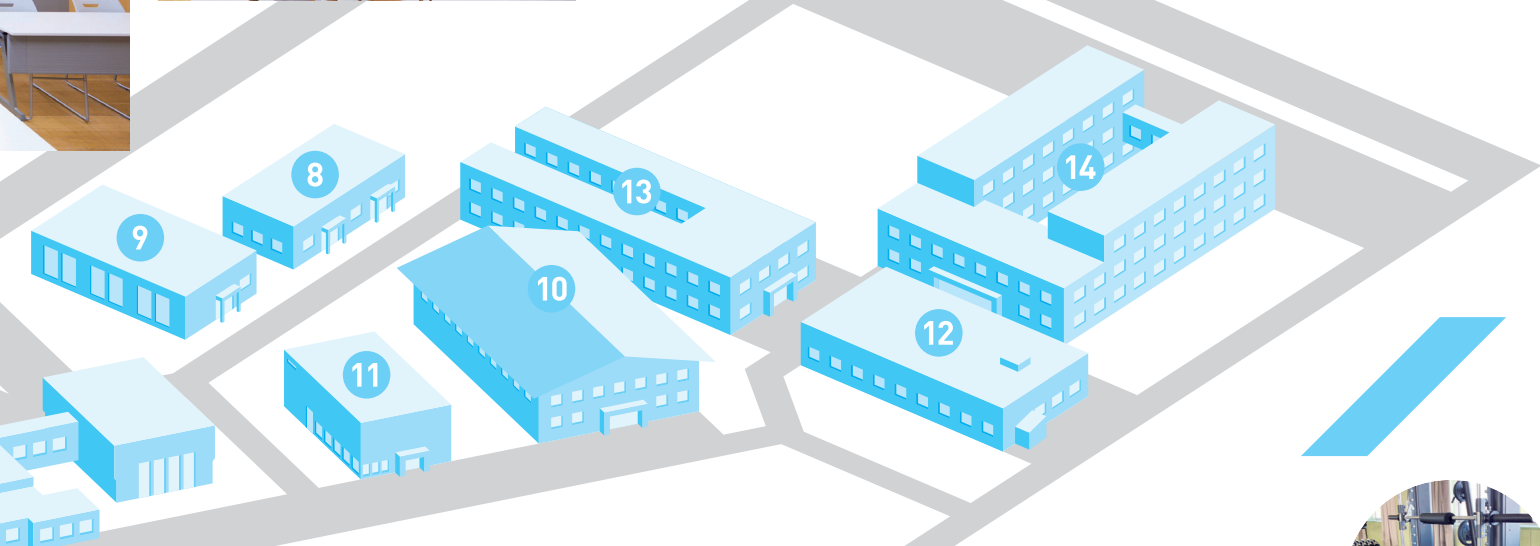

A garage for storing special-purpose airport vehicles.

7

8-2 Da Vinci Library

Every book in the library is in English, and communication is in English Only—no Japanese allowed! High school students dive into English here during classes, break time, and while doing English Club.

7 Heavy Equipment Vehicle Training Center

Students learn the skills needed to be certified to operate heavy equipment vehicles.

9 Cabin Training Center 2 (CTC2)

The classroom building features a stylish Scandinavian-style interior. High school students spend their break time here in the lounge.

10 Arena (Gymnasium)

Our latest training equipment machines were installed in January 2020.

11 Cabin Training Center (CTC)

Actual-size sectional mock-ups of the Airbus A330, A380 and B737 are installed here.

12 DINING HALL Rainbow

With a dining hall that seats up to 480 people, not just dormitory students but commuter students can also enjoy lunch here.

13 Amelia Hall

A dormitory for up to 278 students. (Female-only)

14 Lindbergh Hall

A dormitory for up to 436 students. (Separate areas for males and females)

JAA Sky Lab Opened in 2025

New Classroom Now Open at New Chitose Airport!

Partnering with Hokkaido Airports Co., Ltd., we've opened "JAA Sky Lab" inside New Chitose Airport. This new hub allows us to deliver even more immersive, real-world training directly from the heart of the airport.

Look at Page 22 for an in-depth introduction of our student dormitories!

Select a course (stream) that matches your future career path!

Choose one of five stages (specializations) from within the two course paths (streams) offered!

Train to become an expert in IT knowledge and skills. With careful guidance in programming and digital content, you'll become an IT professional capable of thriving in various fields.

Aiming to become an aviation mechanic or ground handler, you will acquire the foundational knowledge and essential skills needed in the aviation industry. Experienced instructors with extensive practical experience in the field will guide you through hands-on training using real aircraft equipment for more practical lessons.

This stage is designed for those aiming to take entrance exams for national, public, and prestigious private universities, as well as for those pursuing careers in public service. It offers detailed guidance for university entrance exams and civil servant exam preparation.

This stage is primarily aimed at becoming an airline cabin attendant (CA) or airport ground staff (GS). By broadly studying languages and general knowledge, you'll have the opportunity to pursue various career paths, including in the tourism and travel industries.

If you want to enhance your skills in sports or the arts, or aim to become an athlete in the future, our curriculum is designed to meet these aspirations.

Career Paths After Graduation

JAPAN AVIATION COLLEGE

Internal direct progression!

Furthermore, through specialized aviation education, students will acquire knowledge and skills that are directly relevant to employment.

IT Stage

Aeronautical Engineering Course

Kanade Miyoshi

IT Stage, 2nd Year

Graduate of Inaho Junior High School,
Sapporo (Hokkaido)

What Discipline Means to Me

I make it a priority to greet people with a loud, clear voice. Every day, the whole campus is filled with pleasant greetings. Also, observing discipline helps me create structure and use my time effectively. In class, there is a lot to learn, and the pace is faster than in junior high school, but because of that, I've started making sure to review and prepare thoroughly.

Meeting all kinds of people and making new discoveries has been great.

I was interested in IT and machinery, so I attended this school's Open Campus. I liked the relaxed atmosphere and decided to enroll. Dorm life is also a lot of fun. My current roommate is an exchange student from Hungary who is good at Japanese. I also made a close friend who is aiming to be a flight attendant, which has broadened my relationships and perspective. I am aiming to become a programmer and am considering internal progression to college.

Misuzu Takeda

IT Stage, 2nd Year

Graduate of Makkari Junior High School,
Makkari Village (Hokkaido)

Key Points

For success in a future society, we develop foundational skills not only for computer operations, but also for **DX (Digital Transformation) personnel**. *DX (Digital Transformation) High School Certified School

You can learn specialized knowledge of information from the basics to application.

Certifications Offered

- IT Passport / Basic Information Technology Engineer Examination
(National qualification certified by the Ministry of Economy, Trade and Industry)
- Web Design Skill Test
- Adobe Certified Associate
- Color Certification
(supported by the Ministry of Education, Culture, Sports, Science and Technology)
- Illustrator (Creator Ability Certification Examination)
- Photoshop (Creator Ability Certification Examination)

With collaboration from technical colleges, aim to become an expert in your area of interest.

	Digital Content Major	IT Engineering Major
Examples of Future Occupations	● Digital Artist ● Video Creator ● Character Designer ● Space Designer ● Animator	● Drone Pilot ● Application Engineer
Keywords	● CG (2D/3D) ● Web Design ● Copyright Management ● DIT (Digital Imaging Technician) ● VFX (Visual Effects) ● VR (Virtual Reality) ● AR (Augmented Reality) ● Game Graphics	● IoT (Internet of Things) ● AI (Artificial Intelligence) ● Web Systems ● Smartphone Apps ● Game Programming ● Robotics ● Drones

From basic PC operations and programming to digital content creation. Even beginners can confidently learn IT.

As studies and work are increasingly being done online, there is a growing need for personnel with IT knowledge and skills. At Japan Aviation High School, we aim to train such experts. Through careful guidance in programming and digital content, let's become IT professionals who can actively contribute in a wide range of fields!

What Freedom Means to Me

I think this is a campus where you can relax on the sofa during breaks and spend your time freely. The facilities and equipment are new and excellent, providing an ideal environment to study the IT fields I'm interested in. The teachers also highly value the students' independence. If I have any questions, I can easily go and ask them, and they instruct us according to each person's individuality, which is reassuring.

For 14 consecutive years, students have advanced via internal progression to affiliated schools with high job placement rates.

Total Mobility Engineering Department

(4-year program)

This department trains engineers who can excel in various fields. In addition to mastering the operation skills of 3D CAD 'CATIA', we place strong emphasis on programming education. Furthermore, students also receive solid education in the foundational areas of mechanics, electricity, electronics, engineering, and color theory, which builds a strong base. As a result, after graduation, students gain the skills to immediately contribute as effective professionals.

IT Engineer at Mitsubishi Heavy Industries, LTD.

Kousei Nakamori

Graduate of Japan Aviation High School (Yamanashi), Aviation Course, General Stage

Graduate of Japan Aviation College (Hokkaido, New Chitose Airport Campus), Department of Total Mobility Engineering

When I learned there was a department at the New Chitose Airport Campus where I could specialize in design and programming, I decided on internal progression. Both at the high school and the college level, this school foundation offers a lot of practical learning, so I am sure you will encounter fields that you feel are a good fit for you.

Aviation Mechanic / Ground Handling Stage

Aeronautical Engineering Course

Yuto Kitazawa

Aviation Mechanic / Ground Handling Stage, 3rd Year

Graduate of Kami-Noppo Junior High School,
Sapporo (Hokkaido)

What Discipline Means to Me

I always focus on communication to ensure what I want to convey is properly understood by the other person. I learned through my classes and practical training that the job of ground handling is a team effort, and communication is indispensable. I believe that the school life here, which emphasizes daily greetings, courtesy, and etiquette, will be very useful in my future.

Rin Saito

Aviation Mechanic /
Ground Handling Stage, 3rd Year

Graduate of Shirasato Junior High School,
Oamishirasato (Chiba Prefecture)

My goal is to be a professional that people look up to.

When I was little, I looked out the airplane window and saw the ground handling worker who waved at me, and I really admired that. I decided to choose this school as the quickest path to my goal. I've put in effort into various activities such as being the class representative and the dorm committee member. By gaining diverse experience, I aim to nurture human connections and improve my leadership skills to become a professional that even children can look up to.

Key Points

Learning about All Aspects of Aircraft

You will learn about all aspects of aircraft, including their functions, structure, and performance, using a variety of rich materials. You'll get hands-on experience with real aircraft parts and acquire basic technical skills. In ground handling, you will practice using actual materials that are employed in real-world operations.

For 14 consecutive years, students have
advanced via internal progression to affiliated
schools with high job placement rates.

JAPAN AVIATION COLLEGE

Aircraft Maintenance Department (3-Year Program)

As a facility certified by the Ministry of Land, Infrastructure, Transport and Tourism, students can acquire national qualifications while enrolled. We use real aircraft and engines for practical training to master the knowledge and skills necessary to be immediately effective in the workplace. There is also a course to train Class 1 Aircraft Maintenance Technicians in partnership with ANA and JAL.

Ground Handling Department (2-Year Program)

As the oldest Ground Handling Department in the country, we train specialists who support aircraft operations on the ground. We possess the largest number of specialized airport vehicles in Japan for practical training. Students can gain practical experience mirroring actual airport work and acquire 12 types of certifications during their enrollment.

With expert faculty and professional-grade flight facilities, our real-world, integrated high school and college education is a proven gateway to careers at major airlines.

You will acquire the fundamental knowledge and basic skills required in the aviation industry. Instructors with extensive practical experience in the aviation field conduct more hands-on training using real aircraft materials for practical learning experience.

What Freedom Means to Me

I feel a sense of freedom during the after-school time when we study together in a comfortable space, quiz each other on the school bus, or prepping hard for tests as a team. After the tests, everyone gets together to go to New Chitose Airport for a meal, which we really look forward to. I believe we can all enjoy free time happily, precisely because we maintain discipline in our daily lives.

Ground Handler at JAL Grand Service Co., Ltd.

Yuika Suzuki

Graduate of Japan Aviation High School,
Yamanashi General Course,
Sports Course

Graduate of Japan Aviation College Hokkaido,
New Chitose Airport Campus
Ground Handling Department

When I participated in the Open Campus event at the New Chitose Airport campus, I was inspired by the ground handling workers who smoothly carried out their tasks through teamwork. I believe the courtesy and mental fortitude I've learned at this academy will certainly continue to be useful even after graduation.

Aircraft Maintenance Technician at ANA Base Maintenance Technics Co., Ltd.

Ryunosuke Suzuki

Graduate of Japan Aviation High School Yamanashi
Aviation Course, General Stage

Graduate of Japan Aviation College Hokkaido,
New Chitose Airport Campus
Aircraft Maintenance Department,
Class 2 Aircraft Maintenance Technician Course

What I gained at this academy were not just technical skills. The mutual support among friends, learned through dormitory life and club activities, as well as the belief in my own potential, instilled through the guidance of the teachers, greatly helped me realize my dream.

General Stage

International Course

Misato Kamimura

General Stage, 3rd Year

Graduate of Chitose Junior High School,
Chitose (Hokkaido)

What Discipline Means to Me

Being able to naturally give a greeting is useful in any situation. I also believe that polite language reflects a sincere consideration for the other person. I chose this school because I wanted to study languages, and it offers a robust curriculum in English and Chinese. Beyond that, it is a school where I can learn the essence of global communication, including the importance of greetings and using language appropriate for the person I am speaking to.

Student from
Thailand

Jirat Sirirattanapruk

General Stage, 3rd Year

A wonderful school that accepts cultural differences.

I chose this school because I can learn knowledge and skills related to the aviation industry, live in my favorite country of Japan, and because it has many international students. My Japanese study is progressing well, and I have also developed the habit of being punctual. When I miss Thai food, I go to restaurants in Sapporo with my Japanese friends. This is a wonderful school where we acknowledge and enjoy each other's cultural differences.

Students
from around
the world
gather here

We are currently
25 students from

Mali / Ukraine / Thailand / Mongolia /
Kyrgyzstan / Vietnam / Hungary / China (Taiwan)

Key Points

Classes Based on Proficiency Levels

We offer classes that are divided according to proficiency levels for each subject. This grouping is regularly adjusted, allowing students to approach lessons with a constant focus on improving their academic abilities.

Advanced ICT Education

We strongly promote ICT education using various tools across all subjects, including one-to-one PCs for every student, e-learning systems, and electronic blackboards, to enhance the learning experience.

Whether it's university admission or advancement to an affiliated school, we focus on each student's desired path, fostering their strengths through a unique, comprehensive learning approach.

In response to the increasingly diverse career aspirations of students in recent years, it is essential to provide learning that solidifies foundational academic skills and prepares students for university or advancement to an affiliated school. In addition to aviation-related subjects, students primarily focus on courses necessary for university entrance exams.

What Freedom Means to Me

Once a week, we have a "free dress day" where wearing what you want is up to the individual. My mood completely changes depending on my outfit, and I look forward to seeing what everyone else will wear. Everyone here is unique and captivating. Students aiming for the aviation industry and those considering other paths respect each other as we all work hard towards our individual dreams.

**Ritsumeikan University,
College of International
Relations, Department of
International Relations**

Fedir Pasko

From Ukraine

Graduate of Japan Aviation
High School Hokkaido
International Course, General Stage

The National Aviation University of Ukraine in my hometown, Kyiv, has an agreement with this school. I had planned to study in Japan for some time and was accepted here as a student refugee. Studying Japanese was difficult, but by proactively engaging in activities with my Japanese friends and communicating, my understanding of the language and culture deepened. I passed the entrance exam for my first-choice university, where I can study International Relations. My goal for the future is to contribute to preventing international conflict and achieving world peace.

Cabin Attendant Stage

International Course

Tsukushi Kitajima

Cabin Attendant Stage, 3rd Year

Graduate of Aoba Junior High School,
Chitose (Hokkaido)

What Discipline Means to Me

I strongly focus on proper manners and language usage in my daily life. I've even accidentally stopped and greeted non-school people in the street because it's so ingrained in me. This is because I have always been taught that "if you can't do it normally, you won't be able to do it even in a job interview." I believe that daily accumulation of effort is necessary to realize my dream.

Mirai Kudo

Cabin Attendant Stage, 3rd Year

Graduate of Oasa-Higashi
Junior High School, Ebetsu (Hokkaido)

Having fun learning about the work of various occupations.

I enrolled in this school because I hope to become a ground staff member, a position that I've always admired. Something great I realized after enrolling is that this school allows us to learn broadly about the aviation industry. Through hands-on training, I experienced the work of a Cabin Attendant and felt a real sense of purpose. I haven't decided which profession to aim for yet, so until I graduate from high school, I want to broaden my horizons by exploring the appeal of various occupations.

Key Points

Language Proficiency Enhancement Program

We strengthen essential English skills required in the aviation industry. English classes are conducted in proficiency-based groups. With language lessons taught by native-speaking teachers and courses focused on certification preparation, such as TOEFL and Eiken, students can efficiently acquire language skills.

Practical Learning at a Cabin Attendant Training Facility

Practical training is conducted using both Airbus and Boeing mock-ups, allowing students to gain specialized knowledge that will be useful no matter which airline they join.

Direct mentorship from airline staff stationed at our school.

JAPAN AVIATION COLLEGE

For 14 consecutive years, students have advanced via internal progression to affiliated schools with high job placement rates.

Cabin Attendant and Ground Staff Program

(Airline Course, 2-year / Airline & Study Abroad Course, 3-year)

Train to become the face of the world's leading airlines. Utilizing our specialized A330, A380, and B737 cabin mock-ups, students gain the hands-on experience needed to excel in the field. Our exclusive industry partnerships and recommendation programs, including a dedicated track with Skymark Airlines, consistently lead students to career success. In 2025, 51 of our graduates secured positions as flight attendants.

Turn your dream of becoming a cabin attendant (CA) or ground staff (GS) into reality. Through integrated high school and university education with experienced teachers, you will learn the spirit of hospitality.

By learning the basics of aviation and advancing to the affiliated Japan Aviation University, Hokkaido Campus, students can further specialize and gain practical knowledge. This enables them to pursue careers in the aviation industry, including companies like JAL and ANA. Many graduates are actively working as cabin attendant (CA) and ground staff (GS) as immediate assets to the industry.

What Freedom Means to Me

For me, freedom is the time I spend happily on various events, such as cooking curry together with friends and practicing for class presentations. The school has many events, and I feel a sense of freedom during the time I spend enjoying them. Additionally, I learned a lot by participating in various events freely and happily, such as volunteering for the JAL Marathon and teaching middle school students how to tie scarves at the Open Campus.

Japan Airlines Cabin Attendant

Minami Sakai

Graduate of Japan Aviation High School Yamanashi
General Course, Sports & Arts Stage

Graduated from Japan Aviation College Hokkaido,
New Chitose Airport Campus
Cabin Attendant and Ground Staff Program
Airline Course

Achieving my goal of becoming a flight attendant is certainly important, but at this academy, I've also grown tremendously as a person. Through club activities, I honed my mental strength and teamwork skills. Serving as the girls' dormitory leader has taught me responsibility and the courage to take on any challenge without fear.

Skymark Airlines Cabin Attendant

Natsu Sueki

Graduate of Japan Aviation High School Yamanashi
Aviation Course, Cabin Attendant Stage

Graduate of Japan Aviation College Hokkaido,
New Chitose Airport Campus
Cabin Attendant and Ground Staff Program

I was drawn to the high employment rate and excellent facilities, which led me to choose internal advancement to the college. In my interview, my manners, responsiveness, and language skills were highly evaluated, and I truly felt that the cumulative effort from high school contributed to my confidence.

Athletic / Art Stage

International Course

Yuka Fujita

Athletic / Art Stage, 2nd Year

Graduate of Misato Junior High School,
Toyota (Aichi Prefecture)

What Discipline Means to Me

My rule is to keep trying. I do my best at basketball every day, and even on tired days, I practice thoroughly so as not to lose to rivals playing the same position. By doing this, I've become able to do plays that I couldn't before, and this gave me confidence. Knowing the importance of persistence, I began to consistently work on my studies and daily life, and my lifestyle and rhythm have become stable.

Aiko Kanno

Athletic / Art Stage, 2nd Year

Graduate of Kamishirane Kita
Junior High School,
Yokohama (Kanagawa Prefecture)

A school where everyone is thriving and vibrant.

I decided to enroll here because I felt it was an environment where I could focus on basketball. Although the Girls' Basketball team is newly established, it's fun to be able to build the team ourselves. I'm proud that all the students, not just my teammates, live brightly and vibrantly. I believe it's because everyone has something they want to achieve and chose this school for that reason.

Key Points

Outstanding Coaches and Staff

Not only do they have experience as educators, but our coaches also bring professional guidance with their experience on the national stage.

Fostering Initiative and Sense of Responsibility

Through sports and artistic activities, we cultivate individuals who can thrive on the global stage. Students plan their own activities, and coaches provide appropriate guidance to help them grow. By thinking, making decisions, and taking action independently, students develop initiative and the ability to take responsibility in their endeavors.

Diverse Paths After Graduation

Students can aim for university admission through sports, pursue careers as professional or amateur athletes, work as sports trainers or instructors, or progress to internal admission at Japan Aviation University, Hokkaido Campus, with opportunities for employment in the aviation industry.

Japan Aviation College Hokkaido Cabin Attendant and Ground Staff Program

Nanaha Katayama

Graduate of Japan Aviation
High School Hokkaido
International Course,
Athletic / Art Stage

Direct admission to college and aiming to become a cabin attendant!

I had many opportunities to fly on airplanes for the girls' basketball games and developed an admiration for cabin attendants. I believe that the skills I've gained through club activities, including communication, the ability to respond, and careful consideration for people in need, can be utilized in the aviation industry.

Tokyo Healthcare University Department of Medical Healthcare

Misaki Nakamura

Graduate of Japan Aviation
High School Hokkaido
International Course,
Athletic / Art Stage

Heading for a basketball powerhouse to become pro!

The university I chose is the alma mater of many professional athletes. The grit and teamwork I developed in our girls' basketball club, combined with the discipline and personal accountability I learned through aviation training, have become my greatest strengths. My goal is to become a player who earns the trust and respect of everyone around me.

2025 Girls' Basketball

National Tournament Results

- Runners-up in the All-Japan Inter-High Tournament
- Winter Cup 2025 Best 16

Hokkaido Tournament Results

- 1st Place in the All-Hokkaido Inter-High Qualifiers
- 1st Place in the All-Hokkaido Tournament
- Runners-up in the All-Hokkaido Newcomers Tournament

Other

- Participated in the 2025 U18 Nisshin Foods Top League Basketball Tournament

Whether it's university admission or advancement to an affiliated school, we focus on each student's desired path, fostering their strengths through a unique, comprehensive learning approach.

In response to the increasingly diverse career aspirations of students in recent years, it is essential to provide learning that solidifies foundational academic skills and prepares students for university or advancement to an affiliated school. In addition to aviation-related subjects, students primarily focus on courses necessary for university entrance exams.

What Freedom Means to Me

I believe freedom is being able to decide for myself what to do. For example, in basketball, I don't only participate in team practice; I also identify my own weaknesses and work on a practice routine that I've devised myself. I always strive to think carefully and act responsibly so that I can thank the people who have supported me so far through my performance.

Weekly Schedule

Mon.

Monday

Classes : Regular classes from the 1st to the 6th period
Practice : Off

During days off, I spend my time freely like a high school student. I take long baths, relax in the dormitory, go to the hair salon to get a haircut, and take care of my tired body.

Tue.

Wednesday

Classes : Regular classes from the 1st to the 6th period
Practice : 4:00 PM to 6:00 PM for club activities

"Challenge Practice" - During this time, each individual comes up with their own practice menu to address specific challenges and work on overcoming them.

Wed.

Thu.

What is "C.U.P"?

"C.U.P" stands for "Career Up Program." It is a specialized subject for athletes and artists, focusing on skill development and improvement as part of the curriculum.

Fri.

Tuesday, Thursday, Friday

Classes : Regular lessons from 1st to 4th periods
Practice : 5th and 6th periods are "C.U.P."/
Club activities from 4:00 PM to 6:00 PM

Sat.

Saturday, Sunday, Holidays

Practice : Varies depending on the season

Tournaments, practice matches, and half-day practices. When there are no tournaments, one of the weekends (Saturday or Sunday) will be a day off to maintain a balanced schedule.

Sun.

Lindbergh Hall

- Capacity: 436 people (separate men's and women's areas)
- Double-occupancy rooms (single-occupancy by request, dependent on room availability)
- Large public bath
- Laundry (free, bring your own detergent)
- Study room
- Billiards corner
- Toilets

STUDENT DORMITORY

Approximately 70% of students live in the two student dormitories, Lindbergh Hall and Amelia Hall. They are located just a few minutes' walk from the school buildings. Students can enjoy a fulfilling campus life by studying and playing with friends who share the same goals.

Hear from our dormitory students on Page 25!

Amelia Hall

- Capacity: 278 people (women only)
- Double-occupancy rooms (single-occupancy by request, dependent on room availability)
- Private shower booth, private bathtub
- Laundry cafe (free, bring your own detergent)
- Powder room
- Toilets

Wi-Fi available

Free Wi-Fi is available everywhere in the dormitory.

24/7 support

In order to respond to emergencies and disasters, the dormitories are staffed 24 hours a day. Students can enjoy their school life here with peace of mind.

You can talk to a counselor

You may have some worries when you move away from your parents for the first time. If you are worried about your studies, your career path, relationships, or daily life, you can talk to a professional counselor who is always on-site.

SUPPORT

DINING HALL

Rainbow Dining Hall

Well-Balanced
Diet

Daily menus planned by a registered dietitian

With the health of our students in mind, we provide meals every day with a well-balanced menu of staple food, main dish, and side dish. The staple food provides carbohydrates as an energy source, the main dish provides protein from fish, meat, eggs, etc., and the side dish provides plenty of vitamins, minerals, and dietary fiber from vegetables, potatoes, beans, mushrooms, and seaweed, among others. We offer a wide range of Japanese, Western, and Chinese dishes so that students can enjoy their food every day. We support the health of students who tend to have unbalanced nutrition through these meals.

SAMPLE WEEKLY MENU

	Breakfast	Lunch	Dinner
Mon.	Boiled Daikon Radish / Seafood Flower-Wrap / Mini Chicken / Miso Soup / Milk	Beef Steak Rice Bowl / Peanuts and Vegetables / Clear Soup	Boneless Fried Salmon / Marinated-Dish / Pork and Beans / Dessert
Tue.	Mabo Eggplant / Tsutsumi-yaki / Fried Shrimp Cutlet / Miso Soup/Milk	Soy Sauce Ramen / Half Rice Bowl / Gyoza / Dessert	Shio Chanko Nabe / Fried Pork Skewer
Wed.	3 Types of Bread / Neapolitan / Quiche / Imo-mochi / Milk	Local Menu Special / Oita-style Chicken-Tempura / Salad / Miso Soup	Chili Con Carne Rice / Pumpkin Potage
Thu.	Chikuwa with Egg / Tsukune / 2-Color Roll / MisoSoup / Milk	Beef Curry / Salad / Egg Soup	Vinegar Chicken / Namul / Seaweed Soup
Fri.	Minced Vegetable Sautee / Boneless-Grilled Fish / Meatballs / Miso Soup / Milk	Kitsune Soba Noodles / Half Rice Bowl / Shumai / Dessert	Hamburg Steak (with grated Japanese-Daikon Radish) / Salad / Miso Soup
Sat.	2 Types of Bread / German Potato / Quiche / Croquette / Yoghurt	Chinjalosse / Yum Woon Sen (Thailand) / Chinese Soup	Charcoal-Grilled Yakimiku Bowl / Boiled Greens in Soy Sauce / Miso Soup
Sun.	Boiled Hijiki / Sesame Teriyaki Chicken / Egg Roll / Miso Soup / Milk	Boneless Miso Simmered Mackerel / Kinpei Burdock / Mushroom Soup	Meat Gratin / Salad / Soup

We offer a variety of Japanese, Western, and Chinese dishes to ensure students never grow tired of their daily meals.

Irodori-don*
(Seafood Bowl)

*Irodori means "colorful assortment"

Loco Moco Bowl

Ramen

A full-time school nurse

In order to ensure that students have a fulfilling school life, the class teacher and full-time school nurse work together to support their physical and mental health.

Three meals included

We provide three nutritious meals a day with a menu supervised by a registered dietitian (meal costs are separate), so that you can concentrate on your studies. We also cater to those with dietary allergies.

Allergy friendly

We also cater to those with food allergies. After meeting with the school nurse and the food service department, we will prepare specific meals tailored to that individual. To avoid any mistakes, we ask students to show their personal cards before receiving their meals, so they can eat with peace of mind.

COMMUTER STUDENT voice

Direct school bus service from JR Chitose Station!

The school's dedicated bus service runs directly from JR Chitose Station to the school, making the commute very convenient. You can effectively use your travel time by chatting with friends, listening to your favorite music, or studying for the Eiken (English proficiency test).

Rimi Konno

International Course, Cabin Attendant Stage, 2nd Year
Graduate of Chuo Junior High School, Ebetsu (Hokkaido)

Although the commute is long, I enrolled in this school as I feel it to be the quickest way to fulfilling my dream. My junior high life was always hectic, but now I begin my mornings early and on a regular basis. As a result, I gained more time and mental space, enabling me to act proactively. I started a part-time job and guitar, things I've always wanted. Next on my list are the student committee activities.

Favorite
Cafeteria
Dishes TOP 3

- 1 Curry
- 2 Ramen
- 3 Oyakodon
(Chicken and Egg Bowl)

When every day feels good,

your heart

becomes

positive!

There are seats outdoors too!

Enjoy a delicious lunch at the cafeteria!

Commuter students also eat lunch every day at the on-campus cafeteria. The menu, supervised by a nutritionist, is well-balanced and, most importantly, delicious! There is also a small shop inside the cafeteria where you can buy ice cream, snacks, and other items!

My morning routine is watching someone play the piano in the lounge!

There is a piano in the spacious lounge, and my friend plays it really well. Listening to the music in a relaxed atmosphere is my pleasure every morning. It helps me start the day feeling comfortable.

Weekday Schedule

- 4:30 Wake-up** Getting up early gives me time and mental space.
- 5:00 Breakfast / getting ready**
- 6:00 Head to the JR station**
I can beat the rush hour! It's comfortable enough to study or take a nap.
- 7:20 School bus ride** Time flies when you're with friends.
- 8:00 Arrive at school**
Relaxing time: talking with friends or listening to piano.
- 9:00 Classes begin**
- 12:20 Lunch at the cafeteria**
- 16:00 Classes end / club activities**
Table tennis, which I've been doing since junior high
- 18:40 Depart from JR station**
- 20:00 Arrive home**
- 20:10 Dinner**
- 20:30 Bath / self-study / free time**
After finishing homework, I spend time relaxing.
- 23:00 Bedtime**

DORMITORY STUDENT

voice

Oushiro Yoshikawa

Aeronautical Engineerin Course, Aviation Mechanic / Ground Handling Stage, 3rd Year
Graduate of Heguri Junior High School, Heguri (Nara Prefecture)

I am from Nara Prefecture, but I chose Hokkaido because I wanted to go somewhere as far away as possible. I felt that dormitory life would be the best way for me to become independent. I was never a morning person, but now I get up before roll call and, along with my friends on the dorm committee, go and wake up the 1st-year students who are still asleep. I've completely adjusted to both the change in climate and dormitory life.

Fun-loving friends gather

all over Japan and

the world!

Favorite
Cafeteria
Dishes TOP 3

- 1 Tebasaki (Chicken Wings)
- 2 Kakuni (Braised Pork Belly)
- 3 Shoyo (Soy Sauce) Ramen

Every month, the
bus takes us on
a shopping run.

**We're free to go out
after school and
on holidays!**

Whether it's after school or on the weekends, I enjoy the freedom of getting out and exploring. While our dorms are incredibly comfortable, I love heading to New Chitose Airport with friends or experiencing the excitement of a baseball game at Es Con Field. Having that independence makes student life so much fun.

The Dormitory Supervisor is there to help 24/7!

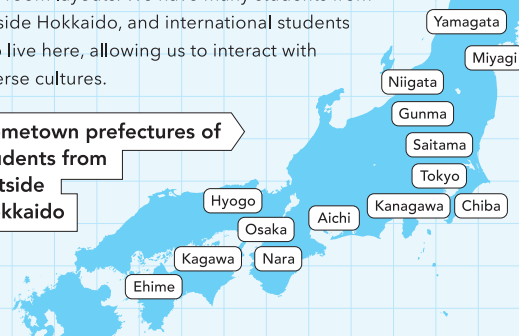

It is very reassuring and helpful that dorm supervisors are present 24 hours a day. They can receive packages and mail for us, which means we can also use online shopping. And of course, they are well-set for security and disaster preparedness.

Many students from outside Hokkaido make it lively!

For two-person rooms, your roommate is also your classmate. There is always something to talk about, from studies to discussing each other's hobbies and room layouts. We have many students from outside Hokkaido, and international students also live here, allowing us to interact with diverse cultures.

Hometown prefectures of students from outside Hokkaido

Weekday Schedule

- 6:30 Wake-up
- 7:00 Roll call
- 7:30 Breakfast at the cafeteria
Rice or bread, there is a lot of variety.
- 8:30 Go to School
- 9:00 Classes begin
- 12:00 Lunch
It's so delicious, you can even top up more rice!
- 16:00 Classes end / club activities
I'm in the study club and soft tennis club.
- 18:20 Dinner
- 19:00 Evening Study*
On Mon, Wed, and Thu, teachers are present to answer questions.
- 20:00 Bath
- 21:30 Roll call
- 22:30 Bedtime

*1st session 17:00~18:00 / 2nd session 19:00~20:00,
on Mondays, Wednesdays, and Thursdays

We went to the UK for
the 2025 Study Trip!

Choice
1

Taunton School in England

(A prestigious public school located in Somerset, in the Southwest of England)

Taunton School is a top-level public school in the Southwest of England. It is a large-scale school consisting of multiple campuses and buildings, accepting students from Nursery up to Sixth Form. Notably, it has an excellent educational track record for international students, having received the Schoolblazer's 2025 Independent Schools of the Year awards. The admission system covers Preparatory School through Senior School, and it also features the "Taunton International School" for international students seeking comprehensive preparation for the British education system.

Choose your study abroad period

Taunton offers a 2-6 week summer school (short-term study abroad course) during the summer vacation, and a one-year long-term study abroad course. In either case, you can take an English evaluation test before studying abroad and enroll in a class that suits your level.

Short Term	Long Term
2 to 6 weeks *1	September of 2nd year of high school - June of 3rd year of high school *2

*1 Summer school is a program that starts at 2 weeks and can be extended by 2-week increments, to 4 weeks or 6 weeks. / *2 (Because of the credit transfer system, students can enroll as third-year high school students after returning to Japan.)

High level environment

There are a wide range of programs, including GCSE (academic qualification for students up to age 16), A-Level (university entrance qualification), International Baccalaureat (international common education program), and BTEC (British specialization qualification), and provide a wide range of academic support to students. In addition, we have a small class size of 8 students, ensuring a system where students receive the most appropriate education.

Boarding school life

Currently, Taunton hosts international students from 62 countries, all of whom live in the dormitory. Sharing not only studies, but also daily life — including meals and living space — encourages active communication and naturally supports the development of English proficiency.

INTERVIEWS with STUDY ABROAD PARTICIPANTS

Momoya Sekiguchi

Aeronautical Engineering Course
Aircraft Mechanic and
Ground Handling Stage, 3rd Year

Graduate of Maekawa Junior High School,
Misato (Saitama Prefecture)

DESTINATION Republic of Malta

PERIOD July 21 – August 8, 2025 (2nd Year)

I deliberately chose a study destination with as few Japanese people as possible. During the entire period, I spoke nothing but English. My ears gradually got used to it, and my aversion to English completely disappeared. It was three weeks where the lifestyle and culture were totally different from Japan. This is an experience I will definitely be able to use in the future.

Chisako Kusama

International Course
Cabin Attendant Stage,
3rd Year

Graduate of Josai Junior High School,
Joetsu (Niigata Prefecture)

DESTINATION New Zealand

PERIOD July 26 – August 23, 2025 (2nd Year)

I was happy that even with my limited English, I proactively spoke to people and was able to make international friends. My strong point is my cheerful personality. However, I also realized that I still have a long way to go by global standards. I want to further refine my own strengths.

University Acceptance Results

These are the results for Japan Aviation High School Yamanashi, as well as for Ishikawa). Japan Aviation Academy adheres to the principle of Bunbu Ryōdō (the harmony of academic and athletic pursuits), cultivating high academic ability and strength of mind and body.

Aoi Nishikawa

Graduate of Japan Aviation High School Hokkaido
International Course, Athlete/Arts Stage

Through my aviation training and my time with the girls' basketball club, I've discovered a real passion for communication. At university, I plan to study media and linguistics while continuing to balance my academic and athletic pursuits. My dream is to enter the journalism industry and share the kind of news that brings a smile to people's faces.

Employment Results

These are the results from Japan Aviation High School (Yamanashi and Ishikawa) and Japan Aviation College (Hokkaido and Ishikawa).

Hokkaido is easily accessible!

Major airlines such as JAL and ANA as well as many low-cost carriers (LCC) fly into Hokkaido with reasonable fares, bringing the rest of Japan even closer when traveling by air.

Airlines Serving New Chitose Airport

JAL / ANA / AIRDO / Skymark /
Fuji Dream Airlines / IBEX Airlines / Peach Aviation /
Jetstar Japan / SPRING JAPAN

*Information current as of March 2025; includes scheduled and seasonal routes.

School shuttle buses departing
from Chitose Station
are available. (About 20 minutes)

Access by Train

Sapporo	▶ Chitose About 30 minutes
Tomakomai	▶ Chitose About 25 minutes
Asahikawa	▶ Chitose About 2 hours 10 minutes
Hakodate	▶ Chitose About 3 hours 30 minutes
Obihiro	▶ Chitose About 2 hours 20 minutes
Kushiro	▶ Chitose About 3 hours 50 minutes
Kitami	▶ Chitose About 5 hours 30 minutes

*For details check the JR Hokkaido homepage.

Access by Car

from the New Chitose Airport Interchange on the Hokkaido Expressway	About 3 minutes
from New Chitose Airport	About 10 minutes
from JR Chitose Station	About 20 minutes

*School bus operational during peak morning and afternoon hours.

**Going home during summer and winter vacation
is easy thanks to the shuttle bus!**

When students go home during vacation period, they may ride the free shuttle bus from school to Chitose Station or to New Chitose Airport. Free shuttle buses back to the school are also available from these two locations.

Open Campus

Take a tour of the campus that at times feels like an airport. Experience parts of the aviation industry and check out sample classes.

*Please note that the program content is subject to change based on the event date.

EXPERIENCE 1

Aviation Mechanic

While observing an actual Cessna aircraft in the hanger, take our quiz and learn about the functions of the various parts of a plane! How many can you get right?

EXPERIENCE 2

Ground Handling

Experience the airport's special vehicles in their entirety! You can test drive a towing tractor, and we'll explain how cargo and in-flight meals are transported using actual vehicles.

EXPERIENCE 3

English Class

Held by native English speakers, enjoy an English session in the special English-only library. There are many picture books and games too. Come check it out!

EXPERIENCE 4

Cabin Crew & Ground Staff

Led by active cabin crew members! Activities include a CAGS scarf-tying experience, in-flight drink service in a mock aircraft cabin, and practicing your announcement voice at the counter.

EXPERIENCE 5

3D Programming

Experience 3D design using the 3D CAD software CATIA. Try your hand at designing in 3D and see how well you can create a design.

And also...

- ◎Explanation of The Stage (specialization) System
- ◎Entrance-exam Procedures
- ◎School Cafeteria and Lunch (free)
- ◎Dormitory Tour
- ◎Individual Consultations
- ◎Mock Exams (for 3rd-year junior high students)

Third-year junior high school students who attend School-based Open Campus sessions may take the mock exam for free, up to three times. (regularly 5000 yen/exam).

at New Chitose Airport / Airport Open Campus

All sessions include a guided tour of our campus following the airport visit.

Detailed schedules and locations are updated regularly on our official website. If applications exceed capacity, participants will be selected by lottery (priority given to 3rd-year junior high school students).

In addition to New Chitose Airport, we also host events at other airports nationwide! Full details regarding dates and locations are available on our website.

School-Held Open Campus

Special English Program

SUN 5/17 SUN 7/12 SUN 9/13 SUN 11/8

Free Shuttle Bus from JR Chitose Station

For Open Campus events in August, transportation to and from New Chitose Airport is available. Advance reservation required.

How to Apply

Apply through our homepage

https://www.jaaw-hs.net/hokkaido/open_campus/

Please visit our website for the full event schedule and the latest Open Campus updates.
