

YAMANASHI CAMPUS "Four concepts"

Go on to higher education

I don't want to get knowledge,
I'm looking for my own way.

Aviation

Longing for the
sky turned into a mission to safety.

Sport

Stating at the far peak.

Performing Arts

A world view of dynamism,
excitement, and ringing.

[Cabin Attendant Stage]

You can be one of the best flight attendants, or ground staffs of good airline companies.

Teachers, who have been well versed in the airline industry educate the students about knowledge and skills with real materials. Through proceeding to our technical college- affiliated high school, you can surely find employment. A lot of graduates are very successful in aviation industry.

VOICE

Ayu Uehara, 3rd grade, Cabin Attendant Stage
From Suwa municipal Suwa junior high school in Nagano

We learn everyday to be flight attendants. We can improve skills for our future dreams. Let's try with us to make your dreams come true!

[Aviation General Stage]

You can be one of the best aviation aircraft mechanics, or ground crew members of good airline companies.

You can learn specialist knowledge about aviation industry during 3 years of high school. Teachers, who have been well versed in the airline industry educate the students about knowledge and skills with real materials.

The rate of employment goes up 100% every year.

To the sky as a pilot in your future

You can learn more practical knowledge as Aviation Weather, Air Navigation, Aviation Regulations, ATC and so on. And if you hope, you can study abroad in the U.S.A. for about one year. We hope you'll gain a great deal from the pilot department in Japan Aviation College in Ishikawa.

Generally leaning about aircraft maintenance

You can learn about aircraft structure and flight principal through experiments and using aircraft models. You can also learn about ground handling with real teaching materials.

Qualifications during
high school days

PRIVATE PILOT (FAA)
01
Pilot licensing and certification from FAA. To a student who hopes to go to the U.S.A. for license.

VOICE

Kae Furukawa, 3rd grade, Aviation Premium Advanced Course
From Kofu municipal Hokusei junior high school in Yamanashi

We have classes not only in daytime, but also at night. We can have good grounding in all subjects, and if we have some questions in daytime, we can solve them by asking the teachers at night classes. And we can study at the self-study room freely whenever we want to use. Let's try with us to make your dreams come true!

[Advanced Course of Athletics and Performing Arts]

You have much possibility through studying and playing sports, and performing arts.

This course is for the students who are eager for success about studying, playing sports and performing arts. Even though you do not clearly decide your goal, teachers lead you to make your capacity wider and make you reach to your goals.

0 period to 10th period from Monday to Friday

VOICE

Tokiya Okoshi, 3rd grade, Advanced Course of Athletics and
Performance Arts
From Omaezaki municipal Hamaoka junior high school in Shizuoka

I try hard every day about both studying and my club activity.
It is hard for me to study in daytime and also at night, but we
all learn for our future. It would be better if you want to challenge
both studying and club activity!

[General Course]

We must keep learning through the whole life, and you have only about 600 days in your high school.

You can learn more about what is necessary for you in the future, through studying both liberal arts and science. You can start from the basics to the practice.

From basic knowledge to practical one. We can improve ourselves.

VOICE

Zhao Yang, 3rd grade, General Course
From Shandong Laiwu Huayuanxuexia junior high school in China

We can learn basic studies and practical learnings in this course. I am a study abroad student from China, and I feel the students of this course are all satisfied with the contents of classes. I like English, but not still good at comprehending long English sentences. Teachers kindly teach us the grammar and its structure, so we can easily solve the questions. Let's study together, and broaden our potential abilities.

Karate training GYM

Table tennis GYM

The largest martial arts hall dedicated to kendo

Taraflex volleyball court

[Sports Course]

VOICE

Hiroto Tani, 3rd grade, Sports Course

In the sports course, there are many well-equipped facilities, and you can engage in sports in a fulfilling environment. In particular, there is a timetable called course lessons, so you can spend a lot of time facing baseball. In addition, we have a top-class weight training room in Japan, so you can improve your muscle strength. Would you like to work hard with us?

[Performing Arts Course]

Wind Orchestra Company

**Music that shines in your heart.
Support that will move your heart.**

In addition to performing at ceremonies and school events and supporting club activities, we are expanding the range of activities to stages outside the school. Professional coaches will give lessons for each instrument so that even beginners can play. Not limited to sitting music, we also incorporate marching and performances to deliver music that resonates with the heart.

Drum Company

Embodies the spiritual culture of Japan.

Wadaike is a musical instrument that has a lot of depth and is hard to touch. In this course, you can learn how to play Japanese drums, learn musical expressions while listening to music with friends, and not only hand down traditional performing arts, but also learn etiquette, attitude, and cooperation.

Wing Dance Company

Polish your self-expression and find a new self.

You will learn a wide range of dances and theatrical singing in all genres such as ballet, theater dance, and HIP HOP. Through many stage experiences and musical creations, you can develop your expressiveness and sensibility. Also, let's acquire necessary elements such as etiquette and cooperation even after going out into society.

VOICE

Riri Makino, 3rd grade, Performing Arts Course

The art course is a course where you can learn dance, Japanese drums, and brass band as part of the class. Since you can directly teach professional teachers, you can learn what you want to do in earnest. I like dancing, so I chose this course because I can spend my lesson time learning and improving. By studying lessons such as ballet, jazz, and hip hop in a fulfilling environment, you will not only improve your skills but also your mental health. In addition, you can learn etiquette naturally, and you can learn a lot of valuable experiences. Why don't you try it together?

[Information Course]

Even if you are inexperienced, you can learn from the basics with confidence.

Now that study and work are done online, more human resources with IT knowledge and skills are needed. Japan Aviation High School has newly established an "information course" to train its specialists.

〈Digital Content Major〉

1st grade	Programming language (JAVA) Computer basics Algorithm basics IT Literacy (IT Passport support)

- Illustrator creator test
- Photoshop creator test etc.

YAMANASHI CAMPUS

We are preparing many ways for the future.

Distinctive

Based on the concept of progressing strengths, the goal is for students to greatly expand areas of expertise.

Educational Goals

We are also focusing on human education with a wide range of basic knowledge and skills, flexible creativity as a leader, and a sense of ethics. Develop manners as an engineer and a member of society.
