[6] 次の英文を読んで、下の問いに答えなさい。（\*印は注があります）

People have always wanted to fly. For hundreds of years they watched birds in the sky. They had a dream of flying like birds. It is very easy for birds to fly. Birds can fly through the air by using their \*wings.

People knew how to make \*kites hundreds of years ago. Kites could stay in the air for many hours. Some people thought, “If birds and kites can stay up in the air, maybe ①we can!”

At first, they made wings like birds. Then, they jumped from high places and tried to fly. Many people did this but they all fell straight to the ground. Some were killed and some were hurt. After many times people knew flying with wings was impossible, so they ( ② ) trying to do so.

Two Frenchmen, the \*Montgolfier brothers, tried another way. Can you guess which way? They tried \*balloons. “Hot air goes up because it is \*lighter than cold air,” they said. “If we fill a balloon with hot air, it will go up.” They built a large balloon of \*cloth and paper in 1783. They made a fire under the balloon. The balloon began to go up into the air! It went up 1,800 meters. Then, the air inside the balloon became cool. It finally came down slowly until it reached the ground.

A few months later, the brothers sent up another balloon. This time there was a \*basket under the balloon. There were three animals in the basket. The balloon traveled through the air to a place two and a half kilometers away. It didn’t go up as high as the first one.

Now, it was time for people to fly! In October 1783, the brothers tried another balloon. This time a man went in a basket. The balloon did not rise very far. It went up only twenty-five meters and stopped. It was \*tied to the ground by a \*rope, so it could not fly away.

The first ③free balloon flight was in December 1783. Two other Frenchmen went up in a balloon full of hot air. This time there was no rope! The balloon went up 900 meters and flew for 25 minutes. It traveled about nine kilometers. It was the first time for people to travel through the air.
